## Editing an Existing Course

---

After courses are built, many of their settings can be changed while the course is in progress (more information can be found in the "*Managing Your Course*" document). The basic functions that *cannot* be changed are as follows.

- Content cannot be removed from the syllabus.
- Assignments that were set to low stakes (un-graded) when the course was built cannot be changed to high stakes (graded).
- "*Changing assignment schedule*" is done for each assignment – the general "*none / automatic / manual preset / just-in-time*" sweeping schedule preferences are not available. However, you can manually update the schedule of each individual activity to any valid schedule.

☞ **Note:** *Once the due date for an assignment has passed, the schedule for the assignment cannot be extended.*
