
Scheduling Individual Student Exceptions

If a student misses a deadline, you may want to grant them an extension. This can be done through the *Schedule Activity* window, accessed from the *Schedule Course* page

Note: *Because the experiments in the Economics course entail live group participation, individual exceptions cannot be granted.*

Schedule Activity

Practice: The Mole

Current Status

Current stakes: 
Schedule Type: Scheduled By Date
Available Date: 01/09/09 1:00 PM
Due Date: 05/25/09 1:00 PM

You may...

- [Change graded status](#)
- [Change schedule type](#)
- [Change scheduled dates](#)
- [Individual student exceptions...](#)

Choose the "*Individual student exceptions...*" action. The system will prompt you for the Account ID of the student for whom you wish to grant an exception.

You will have two options for granting extensions:

- Creating a custom "Just in Time" schedule – This allows you to release and close the activity for this individual as needed.
- Create a custom date range for the student – This date range will automatically open and expire on a certain date and time.

Once you grant the student an exception, a link to this exception will appear at the bottom of the *Schedule Activity* window. Access to this exception will also appear on your *Schedule Course* page. Click on either of these links to modify the exception or to release/close the activity for the student.

Module: The mole Always open		
Practice: The Mole	Available 01/09/09 1:00 PM	Closed 01/09/09 2:00 PM 
→ Exception forreeneep	Not yet released	Not yet Closed
